

Section 5 - Biological Agent/Pathogen Details

5.1 Detail infectious agents used in this project below, one column per agent (insert sheets as necessary). For guidance see http://oba.od.nih.gov/oba/rac/guidelines_02/APPENDIX_B.htm, <http://www.cdc.gov/biosafety/publications/bmbl5/index.htm>, <http://www.absa.org/riskgroups/index.html> or <http://www.phac-aspc.gc.ca/msds-ftss/index-eng.php>. If information is not known (e.g. diagnostic specimens) or is not applicable (human cell lines), indicate that on the form.

	Agent	Agent	Agent	Agent
Name of agent (genus/species and common name if applicable)				
Type of Agent	If other, list:	If other, list:	If other, list:	If other, list:
Risk Group				
From where will the agent be obtained?				
Pathogenic to:				
Infectious Dose				
Natural Modes of Infection				
Primary Laboratory Hazards (e.g. accidental inoculation, aerosols, etc)				
Clinical Symptoms				
Effective Treatments (e.g. antibiotics, immunization)				
Environmental Stability of Agent (e.g. survival time outside host in an infectious form)				
How will you inactivate the agent upon completion of work?
