

Chemical Safety

- Is an appropriate chemical spill kit available?

Hazardous Waste

- Is the current SAA sheet posted?
- Is the current SAA waste manager listed?
- Are SAA waste totals under the limit?
- Is waste properly segregated?
- Is waste compatible with the container?
- Are waste containers in good condition?
- Is waste stored at or near the point of generation?
- Is waste under the control of the generator?
- Are waste containers closed?
- Is the SAA free of spills and leaks?
- Are hazardous waste containers labeled using the updated format?
 - Are the waste hazards associated with the waste clearly indicated?
 - For waste mixtures: are all contents listed with associated percentages totaling 100%?
 - Are Principal Investigator, Building & Room information entered?
 - Are hazardous waste containers marked with the words "Hazardous Waste"?
- Is all waste identified (no unknown present)?
- Is hazardous waste being properly disposed of through EH&S (not poured down sinks)?
- Is all waste being stored in the SAA (not in additional points throughout the lab)?
- Is the monthly SAA self-audit up to date and available?

Roster

- Is the Lab Safety Manager assigned?
- Is a Hazardous Waste Manager assigned?
